Our concept

RECOVER THE ESSENCE OF THE GRAPE

A project designed to lay the foundations of modern viticulture in **Ribera del Duero**, based on the passion, legacy and expertise.

The aim of the winery is to recover the essence of the varietal: the fruit, which must ultimately be the true protagonist of the wines.

Our wine tourism

AN ENJOYABLE EXPERIENCE FOR OUR VISITORS

Wine tourism at Bodegas Cepa 21 is aimed at **young people** who are interested in learning about the world of wine. At our winery, wine amateurs will find their own particular source of knowledge, as well as the chance to discover our spectacular wines.

Cepa 21's wine tourism proposal aims to: entertain, providing an **enjoyable experience** for our visitors; teach, offering our customers a recreational way to learn about viticulture; and socialise, sharing information about the world of wine and welcoming budding wine tasters into this exciting scene.

Your experience

This exclusive and surprising wine tourism perfectly combines a passion for wine and a thirst to **know the finer details of these wonderful varieties.**

Undoubtedly, the perfect combination for those non-conformists for whom enjoyment is simply not enough.
